

THE SPECTACLE

The California State Board of Optometry protects the health and safety of California consumers through licensing and regulation of the practices of optometry and opticianry.

SPRING IS HERE!

Welcome to the Spring 2025 edition of The Spectacle! In this issue, you will find the following updates:

- **Governor Newsom Executive Order: Wildfire Fee Deferral**
- **Spring Allergies and Ocular Issues Article**
- **New Optometry Graduates: Read This!**
- **CLRE Exam Waiting Period Reduced**
- **Sacramento City College Optical Technology Program**
- **CSBO Sunset Review**
- **American Optometric Association Primary Open-Angle Glaucoma Guidance**
- **CURES Fee Increase**
- **Mobile Optometric Office and Home Residence Permit Regulations Applications Available**
- **2025 Board and Committee Meeting Dates**
- **Scam Alert!**
- **Recent Administrative and Disciplinary Actions**

Keep reading to get the latest news and updates from the California State Board of Optometry!

Governor Newsom Issues Wildfire-Related Executive Order

On January 29, 2025, Governor Newsom issued an executive order that extends the deadline to pay fees to renew a license by a period of one year. The executive order applies to any licensee with a license that expires between January 1, 2025 and July 1, 2025 and whose business or residence is in one of the following zip codes: 90041, 90049, 90265, 90272, 90290, 90402, 91001, 91024, 91103, 91104, 91107, 91367, and 93536.

The order also suspends fees that would ordinarily be required for licensees seeking a duplicate or replacement license and allows for replacement licenses to be given to impacted licensees free of charge until January 7, 2026. Further, the order suspends delinquency fees, late fees, and penalty fees for the renewal of a license by impacted licensees until July 1, 2025.

Please reach out to the California State Board of Optometry at Optometry@dca.ca.gov with any questions.

Important Information About Your Address of Record

The law requires licensed optometrists to notify the California State Board of Optometry of each address where optometry is practiced. If you are practicing at a single location, this will be the address of record for your optometrist license. If you are practicing optometry at more than one location, you must apply for and obtain a Statement of Licensure (SOL) for each additional practice location. Under the law, an optometrist may own up to 11 practice locations and can work at an unlimited number of locations. The address of record on your optometrist license should be your primary place of practice.

You can change the address of record for your optometrist license in your BreEZe account; however, you cannot change the address of a practice location for which you have obtained an SOL. For each new practice location, you must apply for a new SOL. If you are no longer working at a location for which you have an SOL, you can submit a written request to cancel the SOL to OptometryLicensing@dca.ca.gov. Please be sure to include your SOL license number in the request. Still have questions? We can help! Send us an email at OptometryLicensing@dca.ca.gov.

Spring Allergies Can Impact the Visual System

In the spring, allergies can significantly impact the visual system through various mechanisms and can affect multiple aspects of eye function and vision quality. By understanding these mechanisms, you can better manage and treat allergic eye conditions.

When an allergen enters the eye, it triggers an immune response that leads to the release of histamine and other chemical mediators. This process specifically affects the conjunctiva, a delicate membrane covering the eye and inner eyelid, causing allergic eye reactions that impact visual quality and function.

Direct Impacts on Visual Function

Vision clarity can be impacted by spring allergens in the following ways:

- Temporary blurriness due to excessive tear production.
- Swollen eyelids that prevent normal eye opening and closing.
- Increased sensitivity to light (photophobia).

Eye comfort is also impacted and may include the following:

- Persistent itching and burning sensations.
- Foreign-body sensation in the eye.
- Fatigue and eye strain.

Types of Allergic Eye Conditions

There are a few different types of allergic eye conditions to be aware of, including:

Seasonal Allergic Conjunctivitis:

- Occurs during spring and fall seasons.
- Caused by pollen from grass, trees, and weeds.
- Typically accompanied by nasal allergy symptoms.
- May also cause chronic dark circles under the eyes.

Perennial Allergic Conjunctivitis:

A year-round condition.

- Triggered by indoor allergens:
 - » Dust mites
 - » Pet dander
 - » Mold spores
- Generally less severe than Seasonal Allergic Conjunctivitis.

More Severe Allergic Eye Conditions:

- Vernal Keratoconjunctivitis: Can impair vision if untreated.
- Atopic Keratoconjunctivitis: May cause corneal scarring.
- Contact-lens-associated papillary conjunctivitis.

How to Manage Spring Allergies

During spring, the days are getting longer, flowers are in bloom, and we enjoy the return of outdoor sports such as baseball and softball. The activities we engage in make it difficult to avoid exposure to allergens, which can impact our eye health. But there are ways to manage the risk!

Environmental Controls:

- Keep windows closed during peak pollen periods.
- Use air conditioning instead of window fans.
- Maintain low humidity levels to control mold.
- Use HEPA filters and mite-proof bedding covers.

Treatment Approaches:

- Avoid rubbing your face and eyes to prevent spreading or worsening symptoms.
- Use **DCA Search** to locate a licensed optometrist and schedule an appointment.
- Consult with your licensed optometrist regarding over-the-counter solutions, such as:
 - » Artificial tears
 - » Antihistamine eyedrops
 - » Decongestant eyedrops
 - » Prescription medications

Prioritize Overall Eye Health:

A comprehensive approach to spring eye health involves more than just short-term fixes. Here are some long-term strategies:

1. Visit your optometrist annually for a comprehensive eye exam.
2. Incorporate healthy foods in your diet, drink plenty of water, and get sufficient sleep.
3. Practice good hygiene by washing your hands frequently, especially before touching your face.

New Optometrist Graduates: Read This!

By mid-May, nearly 2,000 students across the United States will graduate from accredited schools of optometry. California State Board of Optometry staff is preparing to receive 200 to 300 applications from new graduates. If you are a soon-to-be new graduate, please read on for how to start the process of obtaining your license.

CSBO uses an online platform called BreEZe for licensing applications, forms, and account maintenance. Please review the following steps to ensure you are correctly applying for your California optometry license.

1. Open the **BreEZe Website**.
2. Create and register your account.
3. Start an application. Please select **Optometrist-Law Exam Request Application Part 1**.
4. Make sure to add your email address and phone number. Without this information, we cannot process your application request.
5. Complete and pay fee (\$279) for Part 1 of the application. PSI will then contact you to register for the law and regulations exam. PSI may charge a small fee to administer the exam.

6. Complete the law exam and sign back into BreEZe. Click **Manage My Application**. Complete Part 2 of the application. You will be required to pay \$125 for your TLG specialization.

After completing Part 2 of the application process, CSBO must receive the following:

1. **Transcripts:** Your institution must directly submit your transcripts to CSBO **after you graduate**.
2. **NBEO Scores:** Score reports must be released to CSBO. Please contact NBEO to confirm that this option was selected. Your scores will be released after you graduate. Please include your OE TRACKER number in your application. CSBO staff can use this information to access your NBEO scores once you have authorized NBEO to release them to us.
3. **Fingerprints:** Fingerprints must be submitted on CSBO's live scan form. You can email **OptometryLicensing@dca.ca.gov** and request a live scan packet, which will include directions and the form. If you are applying while living outside of California, you must submit your fingerprints by physical or "hard" cards. To do this, contact CSBO at **OptometryLicensing@dca.ca.gov**, provide a mailing address, and request that hard cards be mailed to you.

CSBO also publishes **FAQs** and a **PowerPoint presentation** for new applicants. Please contact CSBO at **OptometryLicensing@dca.ca.gov** with any questions.

Scam Alert!

The California State Board of Optometry has learned of an attempted fraud scheme aimed at CSBO licensees. In the scheme, which is communicated by phone, letter, or fax, fraudulent individuals who identify themselves as CSBO employees or investigators tell licensees that they are under investigation, that their licenses may be suspended, or that arrest warrants have been issued in their names. This is immediately followed by demanding money from the licensees. In some instances, the fraudulent individuals identify themselves as agents of the Drug Enforcement Administration (DEA), the Federal Bureau of Investigation (FBI), or other law enforcement agencies. They may also use "spoofed" CSBO telephone numbers to make their calls appear legitimate.

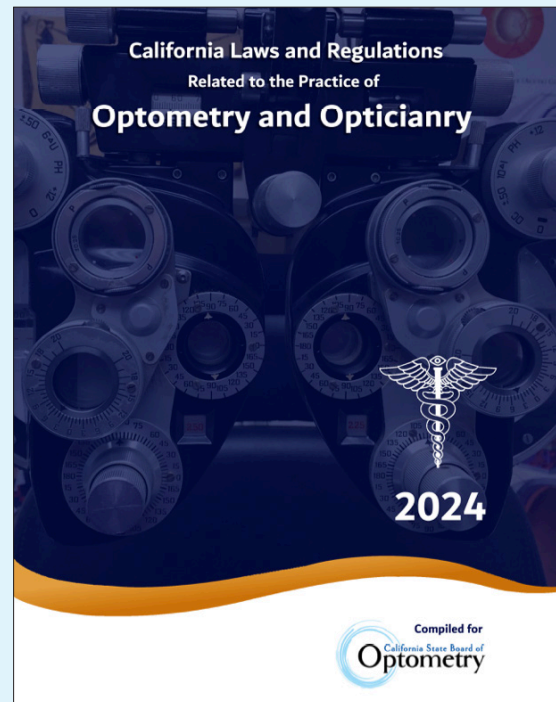

How to Protect Yourself:

- If you have any doubts or questions about someone claiming to represent CSBO, hang up. Then call CSBO directly at (916) 575-7170 (even if this looks like the same number you are being called from) or email **optometry@dca.ca.gov**.
- Refuse payment. Never provide banking and credit card numbers or personal information without first taking steps to verify that the person requesting the information is legitimate. Please also note that CSBO will never ask for credit or debit card information by letter or over the phone.
- You can take down the caller's information (name, title, phone number, and email address) and let them know that you will follow up directly with CSBO. You can also end the call without explanation if it seems suspicious.

California Law and Regulations Exam Waiting Period Reduced

The California State Board of Optometry is pleased to announce that the waiting period to retake the California Law and Regulations Exam has been reduced from 180 days to 90 days. This change will assist applicants who need to retake the exam to achieve a passing score. Additionally, the exam bulletin has been updated and can be accessed on the CSBO website: [CLRE Exam Bulletin](#). All exam candidates should review the exam bulletin and the [laws and regulations](#) governing the practice of optometry in California, which can also be accessed from within the exam bulletin.

CSBO also publishes an [Optometrist Applicant Examination Information webpage](#), which all applicants are encouraged to review.

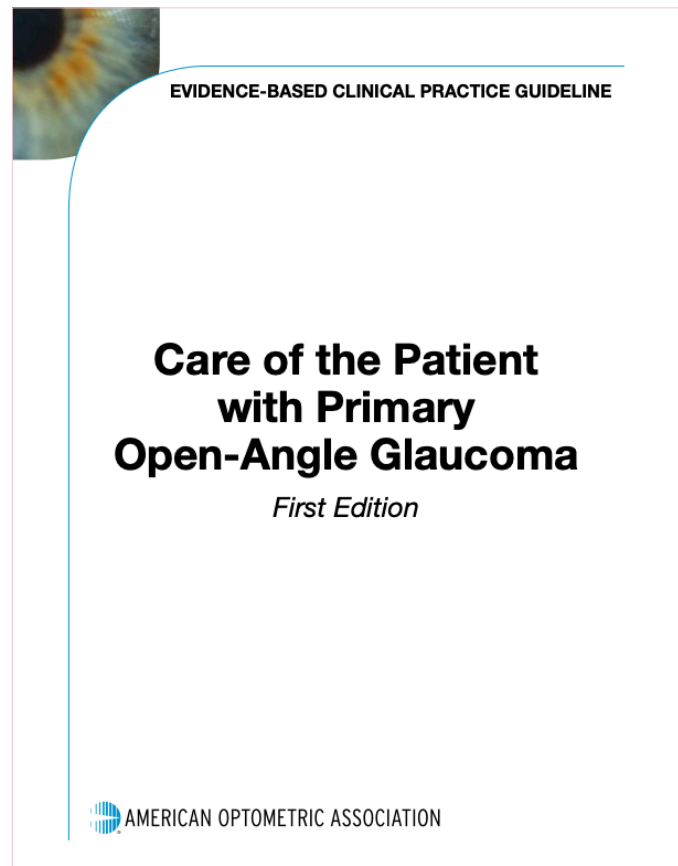

American Optometric Association Releases Guidance on Primary Open-Angle Glaucoma

In communities across California and the United States, optometrists are often a patient's sole eye care provider and may also be their first point of entry into the health care system. According to American Optometric Association (AOA) President Steven T. Reed, O.D., "As the primary providers of eye health and vision care, we are at the frontlines of glaucoma diagnosis, management, and treatment." Given this role, it is imperative that optometrists continually educate themselves and their patients on the most current forms of glaucoma management. Early diagnosis and treatment of the disease can reduce the burden of glaucoma-related vision loss and improve quality of life.

To help increase health care quality based on scientific research, the AOA recently published [Care of the Patient with Primary Open-Angle Glaucoma](#), the first evidence-based clinical practice guidelines for diagnosing, managing, and treating adults with primary open-angle glaucoma.

The California State Board of Optometry encourages all licensed optometrists to review the document and contact the AOA with any questions.

Sacramento City College - Los Rios Community College District

Optical Technician

Optical Technician Certificate

This is the first certificate in the Optical Technology series.

What is an Optical Technician?
An Optical Technician is also known as an Optician.
The Optical Technology program has two certificates that prepare the student for employment as an optical technician or contact lens technician. These two certificates have 7 units of common coursework. It is recommended that the optical technician coursework be taken first. Courses for both certificates are mostly online with some lab time on-campus and an in-person internship required.

How much can I earn as an Optical Technician?
The average salary for an optical technician is \$28.50 per hour in California. 166 salaries reported, updated at August 18, 2024 – indeed.com

Employment Settings
Employment settings include private optometry practices, registered dispensing optician locations, public and private hospitals, clinics and laboratories, optometry schools, optical laboratories, manufacturing companies, educational programs, and the armed forces.

What level of education is needed to work as an Optician?
Upon completion of the Optical Technician certificate, students will be prepared for the American Board Optician (ABO) exam offered through The American Board of Opticianry. Passing this exam then allows one to apply for registration in the State of California. This evidence of competence is recognized throughout the United States.
In addition, graduates will be able to apply for registration as a Registered Spectacle Lens Dispenser with the California State Board of Optometry.

Certificate Requirements

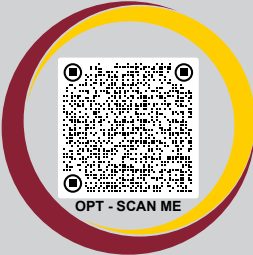

Course Number	Course Name	Units
AH 106	Communication for Allied Health Careers	2
OPT 101	Anatomy, Physiology and Pathology of the Eye	3
CISA 315	Introduction to Electronic Spreadsheets	2
OPT 102	Optical Materials Theory I	3
OPT 103	Optical Materials Skills Lab I	1
OPT 104	Optical Dispensing Theory I	3
OPT 105	Optical Dispensing Clinical Lab I	2
OPT 106	Review Course for American Board of Opticianry (ABO) Certification Exam	1
Total Units		17

CSBO Visits the Sacramento City College Optical Technology Program

On February 13, 2025, members of the California State Board of Optometry visited the **Sacramento City College Optical Technology Program**, located in West Sacramento, to learn more about new programs for training future opticians. The Sacramento City College Optical Technology Program has two certificates that prepare students for employment as an optician: the Optical Technician Certificate and the Contact Lens Technician Certificate. Courses for both certificates are primarily online, with some lab time on-campus and a required in-person internship. The Optical Technician Certificate can be completed in one (1) year and prepares the student to sit for the American Board of Opticianry exam. Passing this exam allows the student to apply for registration as a Spectacle Lens Dispenser with CSBO. Those interested in the program are encouraged to contact Professor Lorraine Champlain at scc-optech@scc.losrios.edu.

California State Board of Optometry Sunset Review Hearing

Every board and bureau in the Department of Consumer Affairs is subject to oversight by the California State Legislature's relevant policy committees. Every few years, each board and bureau goes through a sunset review process. It is called a "sunset" review because the statutory authority of each board legally expires, or sunsets, on a specific date. For CSBO, the law provides a sunset date of January 1, 2026, and if the date is not extended, the California State Board of Optometry will cease to operate.

The sunset review process unfolds in a series of steps:

1. CSBO prepares a sunset review report.
2. CSBO approves the sunset review report.
3. CSBO submits the report to the California State Legislature.
4. CSBO participates in a sunset review legislative hearing.
5. CSBO responds to issues raised during the sunset review process.
6. CSBO collaborates with the California State Legislature and stakeholders to create a sunset review bill that extends CSBO for at least another four (4) years.

CSBO completed its sunset review report in 2024 and submitted it to the California State Legislature on January 3, 2025. A copy of the report can be accessed here: [2025 Sunset Review Report](#). On March 4, 2025, the California State Legislature conducted the sunset review hearing and released its background paper of policy issues. The background paper of policy issues and the hearing itself may be accessed here: [CSBO Background Paper](#) and [CSBO Sunset Review Hearing](#) (hearing begins at the 2:53:30 mark).

CSBO's latest sunset bill is SB 776, and it may be read here: [SB 776](#).

Please contact CSBO at Optometry@dca.ca.gov with any questions about the sunset review process.

CURES Fee Increase

In accordance with legislation enacted in 2024 (SB 164, Chapter 41, Statutes of 2024), the annual Controlled Substance Utilization Review and Evaluation System (CURES) fee will be increasing from \$9 to \$15 for optometrist licenses expiring on or after July 1, 2025. The fee is assessed at the time of license renewal on licensees that are authorized to prescribe, order, administer, or furnish controlled substances.

Most licensees will see a \$30 CURES fee due to the biennial renewal cycle, which allows licensees to pay the annual \$15 fee for two years at a time. The fee covers the regulatory costs of the Department of Justice in operating and maintaining CURES. CURES is a critical element in California's continued effort to address the danger of opioid addiction stemming from prescription drug abuse.

For more information about CURES, please visit: <https://oag.ca.gov/cures>.

Find Us on Social Media

The California State Board of Optometry regularly posts on all of its social media platforms, including: [Facebook](#), [Instagram](#), [LinkedIn](#), and [X](#).

Did you know that CSBO also has an email list? If social media is not your thing, but you still want to stay up to date with CSBO happenings, such as optometry/optician regulations and legislation, public board meeting announcements/agendas, *The Spectacle*, subject-matter-expert workshops, and all other board-related updates, subscribe [here](#).

Mobile Optometric Office and Home Residence Permit Applications Now Available

On January 2, 2025, the California State Board of Optometry released applications for the Mobile Optometric Office program. This program permits a non-profit corporation or charitable organization to own and operate up to 12 mobile optometric offices during the first two-year licensure period. Please visit the **Mobile Optometric Office website** to learn more about this important program.

On April 23, 2025, CSBO also released applications for the Home Residence Permit program. This program authorizes a licensed optometrist to provide optometric services to patients who are homebound.

Please visit www.optometry.ca.gov or email optometrylicensing@dca.ca.gov to learn more.

Recent Disciplinary Actions Taken by the Board

For the most current list of issued citations and disciplinary actions, please visit www.optometry.ca.gov/consumers/disciplinary.shtml.

The California State Board of Optometry provides information regarding administrative and disciplinary actions for the immediate access and convenience of interested persons. You can also use [DCA Search](#) to verify the status of a license or see if a licensed optometrist or optician has had any disciplinary action taken against their license or registration.

While CSBO believes this information to be reliable, human and/or technical errors remain a possibility, and delays are possible when posting or updating the information.

CITATIONS AND FINES

Hwang, David Chien-Ta (OPT 14044)—Orange

On February 11, 2025, a \$650 citation was issued to David Chien-Ta Hwang (OPT 14044) for failing to meet the optometric continuing education (CE) requirements within the 2021-2023 renewal cycle (BPC §§ 3110(a), 3059(e), and CCR § 1536(l)). [Click here to obtain a copy of the action or to view the doctor's license profile.](#)

Kim, Michell Yujin (OPT 34920)—La Quinta

On December 10, 2024, a \$1,750 modified citation was issued to Dr. Michell Yujin Kim (OPT 34920) for failing to maintain adequate and accurate records relating to the provision of services to her patient (BPC §§ 3110(a), (q), and CCR § 1510). [Click here to obtain a copy of the action or to view the doctor's license profile.](#)

Mione, Robert Douglas (unregistered)—Los Angeles

On January 7, 2025, a \$1,000 modified citation was issued to Robert Douglas Mione (unlicensed) for the unregistered practice of fitting and dispensing spectacle lenses to a customer and misrepresenting himself as being able to do so as a registered dispensing optician by his actions and his business card (BPC §§ 2556.5, 2559.1(a)(1), 2564.90, 2543(a)). [Click here to obtain a copy of the action.](#)

Ong, Jennifer Hidalgo (OPT 10520)—Elk Grove

On December 31, 2024, a \$1,000 citation was issued to Jennifer Hidalgo Ong (OPT 10520) for failing to retain patient records for seven years and for failing to maintain adequate and accurate records (BPC §§ 3007, 3110(a), (q) and CCR §1510). [Click here to obtain a copy of the action or to view the doctor's license profile.](#)

Soss, Edward H. (SLD and RDO applicant)—San Francisco

On January 29, 2025, a \$5,000 citation was issued to Edward H. Soss (SLD and RDO applicant) for practicing optometry without an optometrist license, practicing opticianry without the appropriate registrations, fitting and adjusting spectacle lenses without a spectacle lens dispenser registration, fitting and adjusting contact lenses without a contact lens dispenser registration, and dispensing prescription lenses without a registered dispensing ophthalmic business registration (BPC §§3040(a), 3110(s), 2543(a), 2555.5(p), 2556.5, 2559.1(a), 2560, 2564.90, and 2564.91(a)). 2025 Board and Committee Meeting Dates

Each year, the California State Board of Optometry meets at least four (4) times. CSBO's various committees also meet throughout the year. The remaining Board meeting dates are:

- April 11
- July 11
- October 17

Committee meeting dates are as follows:

- May 2
- August 1
- November 7

Meeting agendas are posted at least ten (10) days in advance of a meeting, per the Administrative Procedures Act. Please visit the Board Meeting Page to review agendas and meeting materials.
